

INSTALLATION INSTRUCTIONS FOR 98-0443 USB UPGRADE KIT

This upgrade kit is designed to change the Huntron ProTrack M20 with parallel interface to an USB interface. With the advancement of computers, it is getting harder to find a computer with parallel interfaces. Therefore, Huntron has developed this upgrade to change the computer interface to USB. The conversion consists of removing the existing computer cable and installing a USB connector assembly and USB interface card.

Warning: Disconnect all power sources and other equipment from the ProTrack before attempting this upgrade.

The USB Upgrade kit includes:

01-3399 Bracket, USB PCA (2)

06-2175 USB connector assembly

06-3131 USB interface PCA

06-4196 USB interface parallel cable

06-4195 USB/PS harness
